

This book is meant to be interactive.

As you read this book envision how interactive notebooks will be implemented, managed, and assessed in your classroom.

 Gather your colored pencils, **markers**, crayons, or highlighters and take notes.

Mark up the margins,

place sticky notes where needed,

and  where you see empty space.

Some left-side pages in this book have intentionally been left blank for you to use to process information how you see fit.

Feel free to use the Interactive Café Menu reproducible master (RM) to make connections to what you are learning.

Connected

Let's Stay

Share your insight with our **#R4SciNB** community. We would like to know how you are implementing and managing interactive notebooks in your classroom.

Ready? Let's learn and do.
